Please reclassify broadband internet as a title II common carrier telecommunications service. I am sure I need not go into drastic detail about this, as there is currently an uproar on the internet about it.

Think about who benefits from removing net neutrality...almost nobody, right? Greedy ISPs are about it. Now think about the countless millions who will be affected quite negatively.

It's exactly like putting speed bumps on one side of an existing road, then charging commuters a fee to ride on the "smooth side"...it's downright unethical and should be condemned.

Please do not disappoint the citizens of the internet.

Thank you kindly.
