It's imperative to the future of the United States to classify Internet Service Providers as Title II Common Carriers. One of the most prosperous nations in this history of the world has some of the most expensive, slowest, poorly supported internet access in the world. The internet is the fulcrum by which future innovation will raise, or bring low our country. Reclassify these ISP's and ensure that we don't trade our technological future for a few private corporation's bottom line.
