The FCC should reclassify broadband internet as a telecommunications (or "Common carrier") service. Right now broadband is regulated like TV or radio, which doesn't make sense. Data from internet is similar to electricity. The electricity I use in my own home can be used to power whatever I want. The utility company doesn't tell me that I have to pay extra for powering fans. Or if I want my fans to spin faster I have to pay more. Watts are watts, bits are bits. Defend net neutrality FCC.
