

7521113569.txt

Hello,

We are long past the time to declare broadband internet as a utility, and give it all the rights and responsibilities of common carrier status.

We do not filter phone calls based on what is said.

We do not filter mail based on what is written.

We do not filter traffic based on who made your car.

Allowing ISPs to filter or charge content providers does nothing but hurt both competition and the consumer.

Thank you for your time,  
Daniel Schoenbach
