

7521113593.txt

If the title of this RFC is anything more than empty rhetoric, net neutrality must be restored. It must be restored permanently. I believe that the best way to accomplish this is by reclassifying ISPs as common carriers. If America is serious about its commitment to being a world leader in technology, innovation and even freedom, a neutral and protected internet is vital to our future. Please don't allow a few greedy companies in near monopoly position to take the unbridled potential of a free internet away from this and future generations.
