Please defend net neutrality. I, as a citizen, do not want my freedom of expression to be limited by the companies which provide me a means of expression, simply because it may be more profitable for them to do so. Please reclassify broadband internet as a title II common carrier telecommunications service, and/or do not allow telecommunications companies the ability to give preferential treatment to some kinds of data over others. Whether there are potential benefits to doing so or not, there are certainly potential risks. And since, if these risks come true, telecommunications companies stand to profit, we would be foolish to think that these risks would not eventually come to fruition.
