

7521113781.txt

I beg of you as a citizen of the United States of America not to fall victims to the corporations as we have. The internet should be free and not held hostage by the corporations. The internet is the pinical point of the golden age of technology, it gives people who have no voice in reality a voice in the virtual world including news medias who are not corrupted who tell the facts, it helps with innovations to better the future of humanity with its free wisdom and knowledge, and so many other good and positive attributes.

The ISP's need to be reclassified to common carriers.

Please help us!
