

7521113807.txt

I am a PhD student that is studying Soft Material Robotics. I use the internet everyday and the recent news that ISPs will create fastlanes for certain content is very disturbing. The repercussions of this decision will be felt for decades to come, for better or for worse. I hope that you see how serious this is and how catastrophic this would be for net neutrality. Information should be available to everyone equally and vice versa.

Please reclassify broadband internet as a title II common carrier telecommunications service. This will keep the internet fair and keep knowledge flowing equally. This really is important to me and I can't stand and watch a tool as powerful as we have ever seen be corrupted for profit.
