

7521113817.txt

Please take steps to treat high speed internet as you would water and electricity. the internet has become integral in how our society works, how it creates, and how it communicates. i would not be able to file this if it weren't for the internet.

we lag behind the rest of the world in internet speeds and service. there are large swaths of the country that cannot get anything faster than dial up. this has to change.
