Please reclassify broadband internet as a title II common carrier telecommunications service. The internet needs to keep net neutrality and we cannot let that go away. The freedom the internet provides is not only the freedom to Americans, but freedom to anyone in the world with unrestricted internet like ours. However, this act will take away that freedom and allow new restrictions to be added, taking away of freedom of the internet; this also takes away the freedom of the internet from other people not in the US.
