the FCC should reclassify broadband internet as a telecommunications (or "Common carrier") service. Right now broadband is regulated like TV or radio, which doesn't make sense! Please stop this before it gets out of hand! who knows what Comcast or any other company might decide should pay more for its services at its own discretion! It starts out as netflix, but who knows, it might end up being any site that opposes their views! I really worry about the future of the internet in a world where a business who already pretty much holds a monopoly can openly discriminate their services.
