

7521115314.txt

I want to strongly urge you to support Net Neutrality for the future of innovation, freedom and opportunity. We see what has occurred with the Supreme Court decisions in Citizens United and how that threatens Democracy; the end of Net Neutrality will have the same effect on the Internet and web. The Internet exist due to the investment of the government and the American people. We can not allow monopolies to control the web and diminish innovation. You must support Net Neutrality for the good of our nation and a strong future for all.
