Reclassify broadband internet as a title II common carrier telecommunications service.

The cable companies already has a massive monopoly over all of the US's communication services. Why do they get specialized treatment over companies like Microsoft or Standard Oil. By discontinuing net neutrality you are giving capitalist companies the key to killing off competition and playing nice... they won't. They want the money. They don't care about consumers.

Isn't that why the other mentioned were broken down. Competition is the only thing that protects the consumers interest.
