

7521115669.txt

Dear Sir/Ma'am,

I would like broadband internet to be classified as a title II telecommunication service so that ISP's won't cripple the entire internet. Net Neutrality must be kept at all costs because allowing corporations to dictate what comes through the internet and into my computer enables them to destroy the free flow of information from the internet. If you could also add Armed Forces PO boxes to your state drop down menu, that would be great. I'm APO, AE 09464. Thank you.
