Please! Reclassify broadband internet as a Title II common carrier telecommunications service! I know you guys probably won't read this, but the Internet, as an open market, has led to technological advancements the likes of which had never been seen before! If you abolish net neutrality, the internet's glory will fade, it will become just another inefficient market where bribes are king! Please, I had more faith in the FCC than this. I thought, among all this government corruption, for better or for worse, the FCC still had a backbone, it wouldn't be pushed around by ANYONE.
-Sam Smith, a very concerned citizen
