I am filing a formal opposition to the Comcast Time Warner merger. It is a direct attempt at limiting competition and a move towards creating a Monopoly. United States Citizens already have limited options for Cable providers and this move will limit those options and create poorer more expensive products.

I've done some traveling in multiple parts of the world and I'm shocked at how slow our internet is compared to developing nations. This merger will make this worse and directly effect the wallets and the honor of American consumers.

Please stand against this and be the example the the FAA couldn't be with US Airways and American Airlines merger.

Astute Chairman Tom Wheeler, I understand that turning your buddies in the telecom world need your favors right now but please do the right thing and stand up for what I know you believe in.

Thank you for your time.
