I personally feel that Net Neutrality is extremely important, and I do not feel it is right for Internet providers to filter, limit speed, or anything of that sort to my internet connection. We need to keep these industries from a hostile takeover of one of the most freeing and powerful systems that we as humans have ever created. It is extremely important that we keep the internet neutral. If we allow companies to fleece both sides of the system we are setting ourselves up for major issues in the future, and potentially making free speech non existent. Thank you for taking the time to listen.
