The Open Internet is critical to both democracy and capitalism. The FCC has already made the mistake of allowing regional monopolies, and now we're faced with these Net Neutrality issues. Do not compound the problem with bad legislation unless you are willing and able to correct the regional monopoly problem. This country is ostensibly based on free market capitalism, but you'd never know it from the Telecom/Cable industry. Vote in favor of citizens' rights, not big business profits. Don't be a jerk.
