The internet should remain open and neutral. Millions of Citizens of the United States rely on the ability to search for services, products, and entertainment; and to voice their opinion and ideas. It is a tool, just like the newspaper, the magazine, etc to share information. It is part of the press and promotes our speech. Our freedom of the press and speech are protected under the 1st Amendment of the Constitution of the United States. Businesses rely on promoting their goods and services to consumers and by allowing these corporations to make deals with ISP's, this will greatly limit inter-state commerce. If corporations are considered a person, they represent a single person versus the millions of voices from the citizens of the United States that agree with retaining Net Neutrality. We are a democracy which means the majority makes the decisions, not the minority. Citizens are the majority, corporations are the minority. Please do not allow these corporations to bribe those that are assigned to make decisions that will impact society as a whole. Listen to the citizens of the United States. A quote from the Gettysburg Address, presented by Abraham Lincoln, to remember, "government of the people, by the people, for the people, shall not perish from the earth."
