After taking time to research the topic of net neutrality I wish to inform the FCC that I am in support of net neutrality. Furthermore, I oppose the new proposed regulations by the FCC which would limit access to certain sites at the discretion of broadband internet providers. The internet should be viewed as a public service, like phone service, available to all equally, and as a vehicle of free speech. I hope the FCC will be a voice for free speech, for the people, and leave net neutrality intact rather than leaving access up to big business. Additionally I implore you to classify broadband internet access as a form of telecommunication. Thank you.
