

7521119763.txt

We deserve, as paying consumers, to be protected by the organizations (FCC) put in place to do so. To be allowed to have multiple options to choose from, without worry of being manipulated, contorted, and/or forced into paying excessively for services that are often less than what is being paid for. It needs to stop. Less things have started violent actions and I don't want another civil war.
