Hello,

I want Comcast and other ISPs to be legally considered "Common Carriers."

I believe this will serve the People better than any other measure to obtain Net Neutrality.

I oppose the idea of fast lanes, or whatever term is used, for ISPs. This will throw the internet into the Dark Ages.

Furthermore, I oppose the merger of Comcast and Time Warner. Comcast is, for all intents and purposes, a monopoly, regardless of how many loopholes it has jumped through to make it appear to not be a monopoly.
