I am a web developer and I am very concerned about the FCC's and Chairman Wheeler's plans that would allow Internet service providers to charge for preferential treatment. As the proverbial "developer working out of a garage", I can think of nothing more detrimental to anything I might produce as having to pay just to be on the same level as the behemoth Internet companies.

The proposed rules would destroy Net Neutrality. I urge the chairman to throw them out and instead reclassify broadband as a telecommunications service. This is the only way to restore real Net Neutrality.
