

7521121092.txt

Good afternoon,

I am submitting my voice with many of the others that have posted about net neutrality and your stance towards it. I would ask that you remember that you were created to PROTECT the people of this country. If this is an oath that you consider to be important than I strongly urge you to represent the true voices of the people.

Net Neutrality is important. You guys know it is too. Get rid of those that hamper progress because of their relationships with lobbyists. Stand up for America. You will be rewarded. It's time to protect the internet because it is a tool that we ALL deserve. Unless you designed it, copyrighted it and created it -- you should NOT control it.

Please stand up for what is right FCC.

Christopher Bivin
