I believe in the work that you do. I believe that you know what will happen if they try to set the price on internet access. If you let Verizon and Comcast give people who can afford it faster access to the internet, you will be hurting millions of people. Soldiers who wants to talk to their families or families who wants to talk to each other. The people who pay their bills online, small businesses as well as the entire indie community, from video games to music, all will suffer an unnecessary hardship if the FCC doesn't claim internet access as a utility. Please make the right choice for the people and stand up to Verizon and Comcast. Thank You.
