Dear Sir,

Please stop the merger of Comcast and Time Warner. The reduction of cable providers will lead to an increase in prices and limited choices for consumers. I apologize that I do not go into great detail on this issue because to me when the #1 and #2 cable companies want to merge its simply not good for consumers. It is a very simple supply and demand scenario.

In addition, I am a proponent of a la carte choices for cable. I currently have 200+ channels and pay \$120 a month for cable but in reality we watch less than 20 channels. This is an issue that affects every American each month. Please take a survey and you will find that many citizens do not want the high number of cable channels that are required to get as part of the service. This again is a simple issue of what is best for our country.

Thank you,
