

AT&T wants DirecTV, but the telecom deal would be the largest in years and pose headaches for regulators already mulling Comcast's merger

Please block the Comcast Time Warner Cable merger. Don't even entertain this merger. It should not even be considered. If broadband was classified as Title II and there were competition mandates they would not even be proposing this let alone be able to. This will open a pandora's box for AT&T to merge with DirecTV and erect a DirecT&T.
