

7521123874.txt

Please reclassify broadband internet as a telecommunications (or "Common carrier") service. It's the right thing to do.

You greedy lobbyist lovers make us sick. We know what you are up to here. Stop abusing your power to serve the interests of the few.

The internet is how we communicate and get information. Why would you allow this to become subject to censorship via monopolies like Comcast?

You should be ashamed of yourself, Tom Wheeler (and Barack Obama for appointing you because of your fundraising support).
