Please leave the internet as it is currently open and fair for everyone of all incomes to access and benefit from. If you allow big corporations to squeeze more money from other business and consumers the internet will become a tool only for the rich or people of means. If you do not allow the internet to remain level as is there will be a firestorm of protest by myself and others starting with anyone from the FCC that votes against keeping the internet open to the people since it was taxpayer funded by the people to begin with. Do the right thing!
