Internet Service Providers ARE COMMON CARRIERS. Please vote tomorrow to classify ISPs as Common Carriers.

I pay my ISP to deliver ANY CONTENT I CHOOSE at an agreed upon monthly PRICE for a specified SPEED. I don't want my ISP delivering content I choose from different sources at different speeds depending upon whether or not the source company pays the ISP for faster delivery. This is UNFAIR to consumers, ANTI COMPETATIVE and will stifle innovation. The Internet belongs to NO SPECIFIC COMPANY. It should be regulated as such with NO FAVORATISM given to ISPs.
