Do NOT allow the merger of Comcast and Time Warner Cable. We already have a major monopoly problem within our country - this merger would only strengthen said monopoly. We need more competition and diversity in our cable and internet providers, not less. Competition will lower prices of cable internet, while this merger will only serve to raise prices, lower service quality, and destroy what little industry we have left.

We deserve to pay what we can afford with how hard we work. Currently, cable is not affordable, and with the merger, it will become even more unaffordable. Please do not allow the merger of Comcast and Time Warner Cable.
