Dear FCC,

I'm Raymond Gregory Ferrero III and I live in Fort Lauderdale, FL.

Net neutrality, the principle that Internet service providers (ISPs) should treat all data that travels over their networks equally, is important to me because without it users may have fewer options and a less diverse Internet.

A pay-to-play Internet worries me because ISPs could act as the gatekeepers to their subscribers.

Just try limiting the Internet you corrupt den of thieves. You haven't figured it out yet. The public will run you out of Washington on a rail -- Tarred & Feathered.
