Dear FCC,

I'm Marcy Eicholtz and I live in Elkton , VA.

Net neutrality, the principle that Internet service providers (ISPs) should treat all data that travels over their networks equally, is important to me because without it ISPs could have too much power to determine my Internet experience by providing better access to some services but not others.

A pay-to-play Internet worries me because new, innovative services that can't afford expensive fees for better service will be less likely to succeed.

The Internet is important to me because, small business are already squeezed enough as it is because of the government. This gives big companies with what seems like unlimited budgets to always beat out the little guy. We are tired of being BULLIED by corporations! Give hard working Americans a chance for a change!
