Comcast and Time Warner merging is such a clear antitrust issue, it had better not be allowed to happen. Comcast/NBC already have such a true monopoly on information, THEY shouldn't have been allowed to merge, and you letting them was disgrace.

They control half of what people can see/hear on TV, and whether half the broadband customers in America can even have access to the internet. Allowing these two companies to merge would give them almost total control of information our people have access to.

Do your jobs, protect our nation's future online, and not monopolistic companies and your own pockets.

AND STOP USING THE DAMN REVOLVING DOOR!
