Hi my name is Mike DeGain from Berkley, MI and my zip code is 48072. I'd like to let the senator know that I do not support the FCC's recently passed plan to allow telcoms to alter bandwidth speed on a per-content-provider basis. Further, please let the senator know that I rise in support of reclassification of internet service providers under Title II entities.

I believe that economic incentives and the ability to alter bandwidth speed based on cash contributions will have a huge negative effect on open innovation on the internet, and eventually lead to package based payments for internet services similar to a cable bill.
