Dear FCC,

I'm Noah E Snyder and I live in Los Angeles, CA.

Net neutrality, the principle that Internet service providers (ISPs) should treat all data that travels over their networks equally, is important to me because without it users may have fewer options and a less diverse Internet.

A pay-to-play Internet worries me because ISPs could act as the gatekeepers to their subscribers.

The internet is important to me because I use it every single day for work, play, and school. New policies removing net neutrality would dramatically effect my every day life.
