

7521127866.txt

I am completely AGAINST ANY laws that would in ANY WAY slow down internet speeds for ANY INDIVIDUAL OR WEBSITE on ANY DEVICE.

As a web developer I don't want to have to pay a ransom to anyone to show my site at full speed.

As a user of the internet I am APPALLED that this would even be up for consideration.

As a tax payer and citizen of the United States I am disappointed.

Net neutrality should be enforced so that no single website should ever be subject to ANY THROTTLING.
