The Killing of Net Neutrality is terrible. The head of the FCC, or lobbyist in sheep's clothing for the cable companies, needs to resign.

This is exactly why Americans hate the state of our government today. All this big corporate lobbying going around to secure an ever rising profit margin while choking the consumer into a state of powerlessness makes me want to immigrate to Europe.

Before I go, Relax on the censorship of television, Ok? Why we cannot see breasts on television but we are allowed to see Hardcore violence is borderline insane to me.

Peace,

James
