Here is what I want to say about this:

<http://vihart.com/net-neutrality-in-the-us-now-what/>

The fact that the FCC is even considering anything other than the proposal in the link above is proof that FCC positions are purchased, and that the FCC does not work for the people. Please remember that your loyalties are to the PEOPLE in a representative democracy, not to companies who have already benefited vastly more than is appropriate due to you allowing them to have monopolies. Keep the internet open.
