Are you going to make history? C'mon guys, stop sucking the corporate company's dicks for money. Let them go fuck themselves and keep the internet the way you know it should be, free and open. You aren't making the final decision but you are making a precedent. You are representing AMERICA, and you have a chance to act independent of corporate fuckhead lobbyists like Congress or the House does. If you support the TRUE open internet you will go down in history in saving the internet from the money thieving shits that actually run our country. If they are black mailing you or threatening to kill you, expose those fuckers. Someone or multiple people are imposing their will upon you. You just gonna sit there and take it?
