

7521132117.txt

This not what the people want.

What we (the people, the consumer) want is for the internet to be a classified as a Utility.

Nothing more nothing less.

If you make this ?gatekeeper? plan you will destroy the internet and the last bastions of free speech and uncensored content everywhere.

You are not helping us by kill net neutrality, you're hurting us in the worst kind of way.
