I do not agree with the proposed Net Neutrality rules - The steps in which we are proceeding are not in the best interests of the country as a whole. Any "extra" charges that are placed on ISPs or content providers will eventually be passed on to the consumers, and part of the beauty of the internet is that it is a level playing field. The proposed changes will fundamentally alter the way the public utilizes this important resource. The bandwidth spectrum belongs to all of us, not just those who can afford to pay more.
