Due to the monopolies already held by the companies in question, those being Comcast and Time Warner, I strongly oppose the merging of the two by the FCC. The FCC has the legal obligation to protect consumers from such huge monopolies as this. This will have far-reaching effects and will put America at a technological disadvantage relative to countries in Europe and countries which will be able to pass us in regards to speed with this merger. Please oppose this, the future of our country can be damaged if you don't.
