Cable and internet prices have skyrocketed. I'm on the edge of having to drop my cable service, which is fine because it's more or less a luxury. But we've reached a point culturally where for most people dropping internet coverage is not an option. I'm among them and as a low income citizen I need the protection of the FCC to keep internet affordable. The laws in place to prevent monopolies are there to protect me against the very sort of situation I am facing with Comcast now. Please, PLEASE enforce these laws and prevent this merger! This merger will only enhance Comcast's ability to raise prices even higher, and let's face it; with their record that is something they are likely to do if they are able. Please help me, the average citizen, first, not the powerful corporation! They have plenty of money. They'll be okay, I promise.
