As a registered voter of Tennessee I would ask that this bill be stopped immediately. Ending net neutrality will not boost well for the already failing economy and destabilized public opinion of the American public about the government. I'm a democrat I believe whole heartedly in government influence but how much is to much? When do the people have to stand up and say "Hey this isn't right, we shouldn't be down here under your heel we should be the ones standing side by side with our great leaders." America wasn't founded by a government it was founded by people. People who have their own dreams, goals, and ambitions. So I ask you please do not end net neutrality. The people have had enough.
