

I am writing because of the FCC's failure to defend net neutrality, because of their failure to do their job of doing what is in the best interest of the American people by siding with the wealthy corporations. Net Neutrality is the most important thing required for a free and open internet, and the removal of net neutrality sets an ugly precedence that can easily lead to the suppression of free speech. This 'Slow Lane' plan allows corporations to suppress free speech... a blatant violation of our First Amendment.

Support Net Neutrality. Support the American people!
