

Changing Net-Neutrality :

Please don't mess with it, from my understanding is it will either increase my bill or give me less speed on certain websites, both are not very appealing. I am online a great deal of my day so either of these will hurt me IMMENSELY.

To put it short...Ever hear the saying "If it's not broken, don't fix it?"
Well the *Net* is fine/perfect (unbroken) how it is, so please don't try and *fix* it.
