I believe that the internet should be classed as a "Public Utility" as it is becoming as essential as the US highway and road network. Building out the next upgrade of the Internet to a significantly higher bandwidth to all subscribers is required to allow our children to learn, small businesses to develop, homes to function and our society to flourish. Fast lanes for the larger commercial forces will not benefit society as a whole. Keep it simple and focused on the benefit of society as a whole. This is a long term investment.
