Please do not get rid of net neutrality.. By getting rid of this, you are only hurting the consumers in the end. If ISP's are allowed to charge for higher bandwidth, who do you think will have to pay that expense?? it will be passed on the consumers by the likes of Netflix and Hulu. You are also hurting the chances of any small start up pod casters who cant afford to pay ISP's for premium bandwidth. Please reverse your stance on this and keep net neutrality
