

7521150687.txt

Please do not expand cellphone/mobile services aboard passenger aircraft carriers. As it is already, airline passengers and American consumers cannot sufficiently protect themselves against communicable diseases, and a proliferation of bad manners, rudeness and just plain nastiness. Flying is no treat. Please don't make it worse by forcing us to be exposed to personal conversations less than 3 feet away from us. Some of those conversations should absolutely remain private. Please: DO NOT EXPAND MOBILE WIRELESS SERVICES ON AIRPLANES. Thank you.
